No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 260

NUMBER 1, JANUARY 1988

COMMUNICATIONS

Pseudomonas aeruginosa and *Pseudomonas cepacia* Isolated from Cystic Fibrosis Patients Bind Specifically to Gangliotetraosylceramide (Asialo GM1) and Gangliotriaosylceramide (Asialo GM2)
Howard C. Krivan, Victor Ginsburg, and David D. Roberts 493

Occurrence of Platelet-Activating Factor in Rabbit Spermatozoa
Raj Kumar, M. J. K. Harper, and D. J. Hanahan 497

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

The Insensitivity to Uncouplers of Testis Mitochondrial ATPase
Marta Elisa Vázquez-Memije, Víctor Izquierdo-Reyes, and Graciela Delhumeau-Ongay 67

Site-Specific Induction of Lipid Peroxidation by Iron in Charged Micelles
Kenji Fukuzawa, Toyohiro Tadokoro, Katsuya Kishikawa, Kazuo Mukai, and Janusz M. Gebicki 146

The Effects of α-Tocopherol on Site-Specific Lipid Peroxidation Induced by Iron in Charged Micelles
Kenji Fukuzawa, Katsuya Kishikawa, Toyohiro Tadokoro, Akira Tokumura, Hiroaki Tsukatani, and Janusz M. Gebicki 153

The Action of the Sesquiterpenic Benzoquinone, Perezone, on Electron Transport in Biological Membranes *Alfonso Carabez-T and Francisca Sandoval-Z* 293

Effects of Hypophysectomy and Administration of Growth and Thyroid Hormones on the Hydroperoxide-Induced Calcium Release Process and Glutathione Levels in Rat Liver Mitochondria
Bruce E. Rapuano and Vaddanahally T. Maddaiah 359

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Hydroxyamino Acid Specificity of Smooth Muscle Myosin Light Chain Kinase
Richard B. Pearson, David M. Floyd, John T. Hunt, Ving G. Lee, and Bruce E. Kemp 37

Monoterpene Cyclases: Physicochemical Features Required for Pyrophosphate Binding Determined from Inhibition by Structural Analogs
Carl J. Wheeler and Rodney Croteau 250

Carbon-13 Isotope Effects on Reactions Involving Carbamate and Carbamoyl Phosphate *Peter A. Tipton and W. W. Cleland* 273

Characteristics of Thymidylate Synthase Purified from a Human Colon Adenocarcinoma *Saeed Radparvar, Peter J. Houghton, and Janet A. Houghton* 342

Isolation of a Cytosolic β-Glucosidase from Calf Liver and Characterization of Its Active Site with Alkyl Glucosides and Basic Glycosyl Derivatives
Günter Legler and Erhard Bieberich 427

Active Site Directed Inhibition of a Cytosolic β-Glucosidase from Calf Liver by Bromoconduritol B Epoxide and Bromoconduritol F
Günter Legler and Erhard Bieberich 437

GLYCOPROTEINS AND GLYCOLIPIDS

Monoclonal Antibody R24 Distinguishes between Different *N*-Acetyl- and *N*-Glycolylneuraminic Acid Derivatives of Ganglioside GD3
Tadashi Tai, Ikuo Kawashima, Koichi Furukawa, and Kenneth O. Lloyd 51
Glycoconjugates Secreted by Bovine Tracheal Serous Cells in Culture
A. Paul, J. Picard, M. Mergey, D. Veissiere, W. E. Finkbeiner, and C. B. Basbaum 75
A Biochemical Chimera Suggesting the Existence of at Least Two Dolichol-P-glucose:Dolichol-P-P-oligosaccharide Glucosyltransferases
Nora Iñón de Iannino and Marcelo A. Dankert 139
The Glycosphingolipid Composition of the Placenta of a Blood Group P Fetus Delivered by a Blood Group P_1^k Woman and Analysis of the Anti-globoside Antibodies Found in Maternal Serum
Gunnar C. Hansson, Kazimiera Wazniowska, John A. Rock, Paul M. Ness, Thomas S. Kickler, Rosetta S. Shirey, Jennifer R. Niebyl, and David Zopf 168
Isolation and Characterization of Two Distinct Mannan-Binding Proteins from Rat Serum
Shogo Oka, Ken Ikeda, Toshisuke Kawasaki, and Ikuo Yamashina 257
Effects of Glucose Starvation and Puromycin Treatment on Lipid-Linked Oligosaccharide Precursors and Biosynthetic Enzymes in Chinese Hamster Ovary Cells *in Vivo* and *in Vitro* *Ann E. Chapman and John C. Calhoun IV* 320
Characterization of a β1 → 3-*N*-Acetylglucosaminyltransferase Associated with Synthesis of Type 1 and Type 2 Lacto-Series Tumor-Associated Antigens from the Human Colonic Adenocarcinoma Cell Line SW403
Eric H. Holmes 461

HORMONE STRUCTURE AND FUNCTION

Biological Activity of 26,26,26,27,27,27-Hexafluorinated Analogs of Vitamin D_3 in Inhibiting Interleukin-2 Production by Peripheral Blood Mononuclear Cells Stimulated by Phytohemagglutinin
Kazuhiko Yukioka, Shuzo Otani, Isao Matsui-Yuasa, Hitoshi Goto, Seiji Morisawa, Senji Okuno, Masaaki Inaba, Yoshiki Nishizawa, and Hirotoshi Morii 45

LIPIDS AND PROSTAGLANDINS

Phosphatidylcholine Synthesis in Castor Bean Endosperm: Characteristics and Reversibility of the Choline Kinase Reaction
Anthony J. Kinney and Thomas S. Moore, Jr. 102
The Biosynthesis of Sulfoquinovosyldiacylglycerol: Studies with Groundnut (*Arachis hypogaea*) Leaves *Sita D. Gupta and P. S. Sastry* 125
Non-Protein-Mediated Transfer of Phosphatidic Acid between Microsomal and Mitochondrial Membranes *Jolanta Barańska and Lech Wojtczak* 301

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Accelerating Effect of ATP on Calcium Binding to Sarcoplasmic Reticulum ATPase *F. Fernandez-Belda, F. Garcia-Carmona, and G. Inesi* 118

Lysine and Arginine Transport in the Photosynthetic Bacterium *Chromatium vinosum* *Young-Ae Kim and David B. Knaff* 134
Significance of the Alanine Aminotransferase Reaction in the Formation of α-Ketoglutarate in Rat Liver Mitochondria *Ewa Lenartowicz and Anna B. Wojtczak* 309
Ethanol Stimulates Shape Change in Human Platelets by Activation of Phosphoinositide-Specific Phospholipase C *Raphael Rubin, Biddanda C. Ponnappa, Andrew P. Thomas, and Jan B. Hoek* 480

MEMBRANES, CELL SURFACES, AND RECEPTORS

Biochemical Properties of Purified Transverse Tubules Isolated from Skeletal Muscle Triads *Douglas J. Horgan and Ronald Kuypers* 1
Endogenous ADP-Ribosylation in Skeletal Muscle Membranes *Gopalan Soman and Donald J. Graves* 56
Enhancement of Macromolecular Ligand Binding by Rabbit Alveolar Macrophages by Mannose Oligosaccharides and Related Compounds *Yukihide Ohsumi, Craig A. Hoppe, Tomoya Ogawa, and Yuan Chuan Lee* 241

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Contrasting Interactions between Phorbol Ester and Insulin on the Regulation of Glycogen Synthase Activity and p33 mRNA Accumulation in Rat Hepatoma Cells *Tomokazu Sato, Tian Ye, Andrew Larner, and Joseph Larner* 377

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

The Functional Role of Cytochrome b_5 Reincorporated into Hepatic Microsomal Fractions *Ines Golly, Peter Hlavica, and Walter Schartau* 232

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Binding of Calcium to Glycosaminoglycans: An Equilibrium Dialysis Study *Graeme K. Hunter, Kenneth S. Wong, and John J. Kim* 161

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

The Essential Role of Cobalt in the Inhibition of the Cytosolic Isozyme of 3-Deoxy-D-*arabino*-heptulosonate-7-phosphate Synthase from *Nicotiana silvestris* by Glyphosate *Robert J. Ganson and Roy A. Jensen* 85
Light Inhibition of Mitochondrial Respiration in a Mutant of *Chlamydomonas reinhardtii* Devoid of Ribulose-1,5-bisphosphate Carboxylase/Oxygenase Activity *Pierre Gans and Fabrice Rebeille* 109
Photosynthesis in Phosphoenolpyruvate Carboxykinase-Type C_4 Plants: Photosynthetic Activities of Isolated Bundle Sheath Cells from *Urochloa panicoides* *J. N. Burnell and M. D. Hatch* 177
Photosynthesis in Phosphoenolpyruvate Carboxykinase-Type C_4 Plants: Pathways of C_4 Acid Decarboxylation in Bundle Sheath Cells of *Urochloa panicoides* *J. N. Burnell and M. D. Hatch* 187
Purification and Properties of Ferredoxin–$NADP^+$ Oxidoreductase from the Nitrogen-Fixing Cyanobacteria *Anabaena variabilis* *Javier Sancho, Maria Luisa Peleato, Carlos Gomez-Moreno, and Dale E. Edmondson* 200

Properties and Regulation of Mg^{2+}-Dependent Chloroplast Inorganic Pyrophosphatase from *Sorghum vulgare* Leaves
V. Ananda Krishnan and A. Gnanam 277
Estimation of rRNA Synthesis and Degradation Rates in Senescing Wheat Leaves
Lorenzo Lamattina, Marcela Pinedo, V. Pauline Yudi, Rafael F. Pont Lezica, and Rubén D. Conde 285
Evidence for a Cytochrome *f*-Rieske Protein Subcomplex in the Cytochrome b_6f System from Spinach Chloroplasts
Mohamed El-Demerdash, Johann Salnikow, and Joachim Vater 408
Synthesis and Assembly of H^+-ATPase Complex by Isolated "Rough" Thylakoids
Kenji Shinohara, Ei-ichi Minami, and Akira Watanabe 452

PROTEIN STRUCTURE AND FUNCTION

Isolation and Primary Structure of the Major Toxin from Sea Snake, *Acalyptophis peronii*, Venom *Nobuhiro Mori and Anthony T. Tu* 10
Purification and Partial Characterization of Goose Ceruloplasmin
Maria Hilewicz-Grabska, Alojzy Zgirski, Tadeusz Krajewski, and Andrzej Plonka 18
Interaction of C-Phycocyanin with Lipid Monolayers under Nitrogen and in the Presence of Air *Rami Almog, Frank Marsilio, and Donald S. Berns* 28
Binding of Immunoglobulins to the Major Progesterone-Induced Proteins Secreted by the Sheep Uterus *Peter J. Hansen and Gary R. Newton* 208
Fluorescence Studies of Phosphoribulokinase, a Light-Regulated, Chloroplastic Enzyme
Camillo A. Ghiron, Maurice R. Eftink, Michael A. Porter, and Fred C. Hartman 267
Molecular and Catalytic Properties of a Butyrylesterase from Human Red Cells and Brain *Nina Højring and Ole Svensmark* 351
Purification, Properties, and Evidence for Two Subtypes of Human Placenta Hexokinase Type I *Mauro Magnani, Vilberto Stocchi, Giordano Serafini, Laura Chiarantini, and Giorgio Fornaini* 388
Specificity of Tyrosine Protein Kinases of the Structurally Related Receptors for Insulin and Insulin-like Growth Factor I: Tyr-Containing Synthetic Polymers as Specific Inhibitors or Substrates
Dinkar Sahal, J. Ramachandran, and Yoko Fujita-Yamaguchi 416
Multiple Molecular Forms of Mouse Liver Arginase
Zoltan Spolarics and Judith S. Bond 469

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Bronchial Leukocyte Proteinase Inhibitor: Hydrodynamic Properties and Interaction with α_2-Macroglobulin-Bound Elastase
M. Sharon Stack, Craig E. Smith, William L. Dean, and David A. Johnson 400

REGULATION OF METABOLISM AND OF ENZYME ACTION

Ketone-Body Metabolism in Hyperthyroid Rats: Reduced Activity of D-3-Hydroxybutyrate Dehydrogenase in Both Liver and Heart and of Succinyl-Coenzyme A: 3-Oxoacid Coenzyme A-Transferase in Heart
Rosa Lippolis, Nicola Altamura, and Clemente Landriscina 94

Involvement of the Ornithine Decarboxylase Pathway in Macrophage Collagenase Production *Frederick H. Prosser and Larry M. Wahl* 218
Further Evidence for the Involvement of the Phosphorylation of 46K Protein(s) in the Regulation of Superoxide Anion Production in Guinea Pig Polymorphonuclear Leukocytes *Toshiaki Ohtsuka, Masaki Ozawa, Teruaki Katayama, Naoki Okamura, and Sadahiko Ishibashi* 226
Rat Kidney Mitochondrial Carbonic Anhydrase *Susanna J. Dodgson and Lisa C. Contino* 334
Identification of the Multifunctional Calmodulin-Dependent Protein Kinase in the Cytosol, Sarcoplasmic Reticulum, and Sarcolemma of Rabbit Skeletal Muscle *Hiroshi Sato, Kohji Fukunaga, Shukuro Araki, Iwao Ohtsuki, and Eishichi Miyamoto* 443

NUMBER 2, FEBRUARY 1, 1988

COMMUNICATIONS

A Preferential Inhibition by Zn^{2+} on Platelet Activating Factor- and Thrombin-Induced Serotonin Secretion from Washed Rabbit Platelets *Yinan Huo, Janice Ekholm, and Donald J. Hanahan* 841
Rat Liver NAD(P)H:Quinone Reductase: Isolation of a Quinone Reductase Structural Gene and Prediction of the NH_2 Terminal Sequence of the Protein by Double-Stranded Sequencing of Exons 1 and 2 *Richard M. Bayney and Cecil B. Pickett* 847

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Pyridine Nucleotide Oxidation by a Plasma Membrane Fraction from Red Beet (*Beta vulgaris* L.) Storage Tissue *John L. Giannini and Donald P. Briskin* 653
The Bacteriorhodopsin Proton Pump: Effect of Crosslinkings of Lysine Residues *Rudolf Tóth-Boconádi, Stefka G. Taneva, Aleksandr V. Kiselev, Nashmutdin G. Abdulaev, and Lajos Keszthelyi* 725
The Mechanism of 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine Toxicity: Role of Intracellular Calcium *Georges E. N. Kass, James M. Wright, Pierluigi Nicotera, and Sten Orrenius* 789
Purification of a Manganese-Containing Superoxide Dismutase from *Halobacterium halobium* *Marvin L. Salin and Dieter Oesterhelt* 806

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Substrate Specificity of Nicotinamide Methyltransferase Isolated from Porcine Liver *Theodore A. Alston and Robert H. Abeles* 601
Purification and Characterization of Fructose-1,6-Bisphosphatase from Bovine Brain *Feng Liu and Herbert J. Fromm* 609
Purification to Homogeneity and Some Properties of Squalene Synthetase *Krystyna Sasiak and Hans C. Rilling* 622
Kinetic Mechanism and Nucleotide Specificity of NADH Peroxidase *Vincent S. Stoll and John S. Blanchard* 752

GLYCOPROTEINS AND GLYCOLIPIDS

A 42,000-Da Protein in Rabbit Tissues and in a Glycogen Synthase Preparation Cross-Reacts with Antibodies to Glycogenin
Ignacio R. Rodriguez and Steven J. Fliesler 628

LIPIDS AND PROSTAGLANDINS

Prostaglandin D_2 Formation and Characterization of Its Synthetases in Various Tissues of Adult Rats *Mayumi Ujihara, Yoshihiro Urade, Naomi Eguchi, Hideya Hayashi, Kouichi Ikai, and Osamu Hayaishi* 521

Hydrolysis of *cis* and *trans* Isomers of Retinyl Palmitate by Retinyl Ester Hydrolase of Pig Liver *Dale A. Cooper and James Allen Olson* 705

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Activation of the Ca^{2+}-ATPase of Human Erythrocyte Membrane by an Endogenous Ca^{2+}-Dependent Neutral Protease
Kevin K. W. Wang, Antonio Villalobo, and Basil D. Roufogalis 696

Interaction of Atrial Natriuretic Peptide-Stimulated Guanylate Cyclase and Vasopressin-Stimulated Calcium Signaling Pathways in the Glomerular Mesangial Cell *Sid Kremer, Dean Troyer, Jeffrey Kreisberg, and Karl Skorecki* 763

MEMBRANES, CELL SURFACES, AND RECEPTORS

The Influence of Storage Temperature on the Transition, Activation Enthalpy, and Activity of Enzymes Associated with Inner Mitochondrial Membranes
Murray A. Brown and John K. Raison 798

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Differential Effects of 1,25-Dihydroxyvitamin D_3 Upon Intestinal Vitamin D_3-Dependent Calbindin (a 28,000-Dalton Calcium Binding Protein) and Its mRNA in D-Replete and D-Deficient Chickens
Alan K. Hall, Helmut Reichel, and Anthony W. Norman 645

3-Aminobenzamide Inhibits Poly(ADP Ribose) Synthetase Activity and Induces Phospho*enol*pyruvate Carboxykinase (GTP) in H4IIE Hepatoma Cells
Robert R. Leverence, Elmus G. Beale, and Daryl K. Granner 667

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Differential Inactivation of Plant Lauric Acid ω- and In-Chain-Hydroxylases by Terminally Unsaturated Fatty Acids
Jean-Pierre Salaün, Annick Simon, Francis Durst, Norbert O. Reich, and Paul R. Ortiz de Montellano 540

Rat Liver Cytochrome *P*-450b, *P*-420b, and *P*-420c Are Degraded to Biliverdin by Heme Oxygenase *R. Krishnan Kutty, Reynold F. Daniel, Dene E. Ryan, Wayne Levin, and Mahin D. Maines* 638

Resolution of the Rat Brain Heme Oxygenase Activity: Absence of a Detectable Amount of the Inducible Form (HO-1)
G. Michael Trakshel, R. Krishnan Kutty, and Mahin D. Maines 732

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Substrate as a Source of Thermodynamic Nonideality in Enzyme Kinetic Studies: Invertase-Catalyzed Hydrolysis of Sucrose *Keith E. Shearwin and Donald J. Winzor* 532

Multiple Binding of Bilirubin to Human Serum Albumin and Cobinding with Laurate *Hiroshi Sato, Bent Honoré, and Rolf Brodersen* 811

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Purification and Characterization of Phytase from Cotyledons of Germinating Soybean Seeds *Donna M. Gibson and Abul H. J. Ullah* 503

Purification and Characterization of Acid Phosphatase from Cotyledons of Germinating Soybean Seeds *Abul H. J. Ullah and Donna M. Gibson* 514

Synthesis of the Cyanogenic β-Glucosidase, Linamarase, in White Clover *M. Alison Dunn, Monica A. Hughes, and Abid L. Sharif* 561

Purification and Characterization of an Inducible Aromatic Amino Acid-Sensitive Form of Chorismate Mutase from *Solanum tuberosum* L. Tubers *Gary W. Kuroki and Eric E. Conn* 616

NADP-Malate Dehydrogenase from Leaves of *Zea mays:* Purification and Physical, Chemical, and Kinetic Properties *Takeshi Kagawa and Patrick L. Bruno* 674

Kinetic and Regulatory Properties of Arogenate Dehydratase in Seedlings of *Sorghum bicolor* (L.) Moench *Daniel L. Siehl and Eric E. Conn* 822

Purification and Kinetic and Structural Properties of Spinach Leaf NADP-Dependent Nonphosphorylating Glyceraldehyde-3-phosphate Dehydrogenase *Alberto A. Iglesias and Manuel Losada* 830

PROTEIN STRUCTURE AND FUNCTION

Thymosin β_4^{Xen}: A New Thymosin β_4-Like Peptide in Oocytes of *Xenopus laevis* *Ewald Hannappel, Hubert Kalbacher, and Wolfgang Voelter* 546

Characterization of DNA Polymerase α Activity from a Mouse DNA Temperature-Sensitive Mutant, Strain tsFT20, Which Shows a Defect in DNA Polymerase α Activity at Restrictive Temperatures *Toshihiko Eki, Takemi Enomoto, Yasufumi Murakami, Fumio Hanaoka, and Masa-Atsu Yamada* 552

Limited Tryptic Proteolysis of Pig Kidney 3,4-Dihydroxyphenylalanine Decarboxylase *Brunella Tancini, Paola Dominici, Maurizio Simmaco, Maria Eugenia Schininà, Donatella Barra, and Carla Borri Voltattorni* 569

Purification and Characterization of *glpQ*-Encoded Glycerophosphodiester Phosphodiesterase from *Escherichia coli* K-12 *Timothy J. Larson and Ali T. van Loo-Bhattacharya* 577

Fluorescence of Equine Platelet Tropomyosin Labeled with Acrylodan *Ian D. Clark and Leslie D. Burtnick* 595

Immunoaffinity Purification of Melanoma Growth Stimulatory Activity *H. Greg Thomas and Ann Richmond* 719

Limited Proteolysis of Inactive Tetrameric Chloroplast NADP-Malate Dehydrogenase Produces Active Dimers *K. Fickenscher and R. Scheibe* 771

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Interrelation between the Charge Isoforms of Mammalian Ornithine Decarboxylase
John L. A. Mitchell, Michael D. Rynning, Hong J. Chen, and Margaret F. Hicks 585

Identification of Latent Procathepsin H in Microsomal Lumen: Characterization of Proteolytic Processing and Enzyme Activation
Yukio Nishimura and Keitaro Kato 712

REGULATION OF METABOLISM AND OF ENZYME ACTION

Inhibition of Glycogen Synthase (Casein) Kinase-1 by Heparin
Toolsee J. Singh 661

Rat Hepatic Glutaminase: Purification and Immunochemical Characterization
Eleanor M. Smith and Malcolm Watford 740

Synergistic Stimulation of Pregnenolone Synthesis in Rat Adrenal Mitochondria by *n*-Hexane and Cardiolipin *Brian C. McNamara and Colin R. Jefcoate* 780

NOMENCLATURE ANNOUNCEMENT 851

AUTHOR INDEX FOR VOLUME 260 855

The Subject Index for Volume 260 will appear in the December 1988 issue as part of a cumulative index for the year 1988.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Gene sequences should be simultaneously submitted to a gene databank. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5×7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5×11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Susi, H., and Byler, D. M. (1987) *Arch. Biochem. Biophys.* **258,** 465–469.
2. Bovey, F. A., and Jelinsky, L. W. (1983) Chain Structure and Conformation of Macromolecules, p. 150, Academic Press, New York.
3. Britton, G. (1985) *in* Methods in Enzymology (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
